

Environment Policy

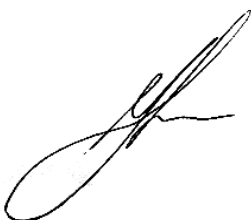

28 South Environmental Pty Ltd (28 South) has made a commitment to environmental management and embraces the philosophies of ecologically sustainable development as a core belief and foundation of how we conduct our business and operations.

28 South recognises its responsibilities as a provider of environmental services to a wide variety of industry sectors to be committed and a leader in environmental awareness. 28 South is fully committed to providing high quality professional, ethical and technical services in a manner that is responsible and well-suited to the requirements of our work environment.

28 South acknowledges and endeavours to exemplify the vision of ecologically sustainable development. As a commitment to this 28 South will:

- Ensure that all 28 South staff or representatives including directors, management, employees and sub-contractors, are aware and cognisant of environment and their responsibilities as a part of our company and what 28 South represents.
- Provide open and truthful communication with our clients, stakeholders and regulators regarding all contractual environmental requirements.
- Comply with all legislation, regulations, policies and standards applicable to our work, scope and deliverables. 28 South strive for and recommend conformance with best management practice.
- Conduct all professional services in a way that minimises environmental harm.
- Proactively contribute and be involved with public discussion, debate and policy formulation through our active role in relevant institutions, government associations and general practice.

Where 28 South are responsible for our professional practices, the company will manage the environment through our management systems, core beliefs and standards and monitor our company's performance and progress against industry standards.

Mitchell Taylor

Director
