

Environmental Planner/Scientist

- Permanent Full-time
- Boutique Environmental Consultancy
- Great career development opportunities

28 South Environmental

28 South Environmental is a boutique, industry-leading environmental planning and ecological services consultancy. We are Brisbane-based but provide expert strategy to our clients in the urban, infrastructure, renewables, energy, agriculture and legal industries across Queensland and New South Wales. Further detail on our services, sectors and projects, and key staff is provided at www.28south.com.au

Role and Responsibility

Due to continued demand for our services, we seek a highly motivated environmental planner / scientist to fill a full-time position in our Brisbane office. This role requires the applicant to have an understanding of the local, state and federal environmental planning legislation governing our client's projects, and an ability to assist with the negotiation of complex development approvals. The position offers an opportunity to work on a wide range of development projects across Queensland and New South Wales. As a part of our team, your role will include:

- Assistance with project, client, and sub-consultant management;
- Providing assistance with due diligence advice for our diverse projects, including urban development; integrated resorts; renewables projects; rural development; quarrying and ecotourism;
- Building and maintaining a strong understanding of Commonwealth, State and Local Government environmental planning legislation;
- Providing strategy and design advice as a part of our team for projects;
- Assisting with the preparation of technical and compliance reports, including coordinating subconsultant inputs;
- Representing the company with senior staff at project and client meetings and industry forums; and
- Field work – on a case-by-case and best for project basis. It is important to note that this role will not require you to undertake frequent or extended field work in remote areas (e.g. *week on-week off* arrangements, but rather high-level site inspections).

Relevant Qualifications and Skills

As the successful candidate, you will have 2-5 years of professional experience, and considerable experience in a consulting environment (*Core Criteria*). While we are an environmental services firm, if you have a town planning background with an interest in transitioning to environmental planning you are also encouraged to apply. *Further criteria* are:

- A tertiary degree in Environmental Planning, Town Planning or Environmental Science;
- An understanding of Commonwealth, State, and local government environmental planning legislation
- Familiarity with environmental and ecological principles, and a willingness to build on these skills with time and training. However, the role does not necessarily require exceptional field skills or a strong ecological background;
- An ability to think laterally and pragmatically to solve the development compliance issues faced by our clients. Demonstrated experience in this regard will be very important, and should be highlighted by the applicant;
- A demonstrated ability to work independently and interdependently as required;

- Well developed written and verbal communication skills (confident and articulate);
- High level of software skills (Microsoft suite and Adobe suite – GIS skills are desirable); and
- Willingness to assist with and manage field investigations with our ecologists and other technical disciplines that our team manages.

What does 28 South Environmental Offer

In addition to a competitive salary, we offer you: the opportunity to work alongside highly experienced industry professionals; further develop your professional skills through company-supported industry training; further develop your professional network through company-supported attendance at industry events (QELA, EIANZ, PIA); and flexible working arrangements to suit personal life circumstances where appropriate and approved.

Applications

If you meet the noted criteria, and seek to make a positive step in your consulting career, please send a tailored CV to Mitch [@28south.com.au](mailto:Mitch@28south.com.au). No CV will be accepted from recruitment agencies..
